Risk-In Co-Founder

Risk-In
EDITO

Dear Risk-In delegates,

It is an immense pleasure to welcome you to the first edition of a truly independent risk management conference.

The idea of such an event came from the need expressed by a number of you to create an environment where speaking about risks would be beneficial, safe and constructive for you and your organisations.

We believe, that in today's environment, risks are evolving more rapidly and more unexpectedly than a decade ago, a month ago or even yesterday. Political events, disruptive technologies, climate change are affecting our ways of working. There is a need to

break the silos in order to enhance smart decision-making through better identification, analysis and risk treatment.

The wide variety of background represented at Risk-In proves us right. We created this interactive environment and it is now your responsibility to get the most out of it.

May the Risk be with you!

Creating trust in the digital world

We believe cybersecurity should be about what you can do – not what you can't. At EY, we believe that turning traditional thinking on its head and adopting an innovative and positive approach to manage cyber risk will set organizations free to achieve their business aspirations in a digital world.

◆◆◆ The better the question. The better the answer. The better the world works.
